## My Smart Phone Is My Key

### Door Opening with Mobile Phone

ZKBiobl App. is a door lock management software for mobile devices, which is compatible with Apple and Android phones. It is mainly used for door opening with mobile phones, mobile user management and user information review etc.

## Make more out of your rooms

### Mobile Unlock (Long Distance)

ZKTeco Smart Lock with the ZKBioBL App provides you with a simple and inexpensive way to provide access to all your members, guests and co-workers. Even if you are not at your place, you can generate a visitor password with only a single synchronization with door locks and remembrance of passwords. Passwords have a limited time for higher security and better protection. Bluetooth is not required for visitor password, you may send passwords to every corner in the world without any limitation of time and location.

## Allowing access for those who come to help Timeslot Management

Different timeslots can be set for the convenience of different personnel's entrance. It is able to use mobile phones to control access rights for more convenient operation. There are total 12 timeslots, timeslot 1 and 2 are default timeslots, timeslot 1 represent all-day access, timeslot 2 represent all-day access without permission required, these two are unchangeable, and the remaining timeslots are changeable. Roles include housekeeper, sanitary staff etc.
